OBJECTIVE:

Seeking the Cyber Security Engineer role at ISG Search Inc, applying skills from the Cyber Security postgraduate program to develop and implement advanced security solutions. Emphasizes incident response, threat detection, and SIEM optimization while promoting clear communication and teamwork across technical and non-technical stakeholders.

HIGHLIGHTS OF QUALIFICATIONS:

- Proficient in SIEM platforms (Splunk, QRadar, Sentinel) with experience in use case development, dashboard creation, alert tuning, and security event monitoring to detect and respond to threats effectively.
- Strong knowledge of incident response, vulnerability assessments, and threat-hunting activities, with experience in root cause analysis and implementing remediation measures.
- Skilled with core security technologies, including firewalls, IDS/IPS, endpoint protection, DLP, and vulnerability scanners, ensuring secure enterprise operations and regulatory compliance.
- Experienced in Python and PowerShell scripting to automate security tasks, develop custom tools, and enhance threat detection and response processes.
- Effective communicator and collaborator, capable of conveying technical concepts to non-technical stakeholders and integrating security into project lifecycles across teams.

TECHNICAL SKILLS:

- **Programming & Scripting:** Python, C++, Dart, Flutter, JavaScript, HTML, CSS, SQL
- **Security & Networking:** SIEM (Splunk, QRadar, Sentinel), IDS/IPS, firewalls, endpoint protection, IoT security, Linux administration
- **Database & Cloud:** SQL, SQLite, Firebase, secure database management, cloud monitoring
- **Tools & Frameworks:** Testing & debugging, Adobe After Effects, Adobe Premiere Pro, Adobe CS5, UI/UX design, editing & designing
- **Installation & Maintenance:** Hardware/software installation, system setup, network configuration, and maintenance

EDUCATION:

Cybersecurity, Postgraduate Certification

George Brown College, Toronto, ON

Sep 2025 – Sep 2026

- Developed and implemented SIEM use cases and security projects.
- Gained hands-on experience in incident response and threat hunting.
- Automated security tasks using Python and PowerShell.
- Conducted network and system security assessments.
- Collaborated on team projects integrating security best practices.

Bachelor of Computer Engineering

Jamia Millia Islamia University, New Delhi, India

Aug 2018 – Aug 2022

- Studied core computer engineering subjects including algorithms, data structures, and computer architecture.
- Gained hands-on experience with programming languages: C++, Python, Java, and SQL.
- Completed projects involving software development, embedded systems, and IoT applications.
- Developed problem-solving and analytical skills through lab work and design projects.

- Collaborated in team-based assignments, emphasizing communication and project management.

Advanced C++ and Data Structure
Coding Blocks, New Delhi, India

Aug 2021 – Feb 2022

PROJECTS:

Smart Chair - IoT Based Infrastructure to Collect Patient's Data	Aug 2021 – Dec 2021
Automatic Traffic Accident Detection and Notification with Smartphones	Feb 2022 – Aug 2022

PROFESSIONAL EXPERIENCE:

Shipping and Receiving Coordinator Belvika Trade and Packaging Ltd, Mississauga, ON	Feb 2024 – Sep 2025
<ul style="list-style-type: none"> • Coordinated inbound/outbound shipments with accuracy and timeliness • Maintained detailed records and inventory logs • Collaborated with team members and vendors to streamline workflow • Improved processes, demonstrating analytical and problem-solving skills 	
Freelance Web Developer Atlas Security & Investigation, Mississauga, ON	Jul 2023 – Jan 2024
<ul style="list-style-type: none"> • Designed a user-friendly website, boosting traffic by 60% • Managed full website lifecycle: design, development, deployment, and maintenance • Created an internal admin portal • Delivered cost-effective web hosting, reducing expenses by 20% 	
Freelance Web Developer Giloy Ghar Film Collective, New Delhi, India	Feb 2023 – Aug 2023
<ul style="list-style-type: none"> • Developed a user-friendly website interface, increasing traffic by 72% • Led full website lifecycle: design, architecture, development, deployment, and maintenance • Built the complete backend • Implemented cost-effective web hosting, cutting expenses by 35% 	
IT Support Technician Buy & Fly Travels, New Delhi, India	Jun 2022 – Feb 2023
<ul style="list-style-type: none"> • Supported hardware, software, and network issues, resolving tickets promptly • Installed and maintained desktops, laptops, and peripherals • Managed user accounts and permissions • Performed system updates and upgrades to boost performance 	
Mathematics and Physics Instructor Qais Rabin Qarzi Educational Center, Kabul, Afghanistan	Jan 2016 – Dec 2018
<ul style="list-style-type: none"> • Planned and taught standards-based lessons, improving average grades by 23% • Used multiple teaching modalities to meet diverse learning styles • Assessed student progress and coordinated lesson plans with staff • Trained new teachers in project-based learning, wellness, and tech integration 	

INTERNSHIPS

IT Help Desk Technician World Peace Institute of United Nations, New Delhi, India	Jan 2022 – Apr 2022
